First Knowledges Politics
PHILOSOPHICAL ORDERING BY COUNTRY
MORGAN JAMES BRIGG AND MARY GRAHAM

First Nations peoples of Australia are among the world's oldest political designers. For them, Country isn't just a place to live, it's part of the network of relationships that shape responsibilities, behaviour and decision-making - a template for living together.

First Nations social and political systems balance individual freedom with a strong sense of responsibility and connection to others. By placing relationships at the centre, these systems encourage ethical behaviour and create long-term stability and security.

Mary Graham and Morgan Brigg interrogate and unpack two political systems - cultural and colonial - that appear to be at opposite ends of a continuum. Politics is about how these two systems can move together and, in these unpredictable times, help to guide the building of a modern Australia.

The Hermetic Order of the Golden Dawn

MAGIC ARTS AND THE OCCULT REVIVAL
FELIX JOHN TAYLOR

The first full-length narrative history of the Hermetic Order of the Golden Dawn, the esoteric society at the center of the 19th- and 20th-century rise of the occult.

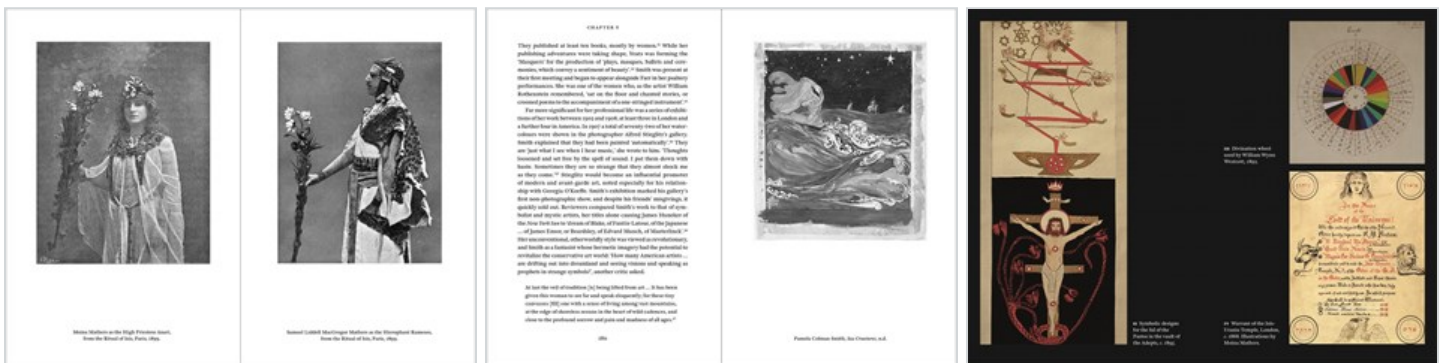

Occultism has long been associated with the visual and literary arts, the wild and the avant-garde, and nowhere was this more embodied than in the Hermetic Order of the Golden Dawn. Founded in London in the 1880s by Freemasons, it was the world's most famous secret society. In this fresh, bracing narrative history, Felix John Taylor recounts its rise and fall through the men and women for whom the Order represented both an alternative to traditional Victorian religious values and a space for imaginative exploration.

The text features well-known literary and cultural figures such as W. B. Yeats and Aleister Crowley alongside a number of lesser-known, but no less intriguing, names. Illustrated with compelling, unusual archival material, including designs by Aubrey Beardsley, imagery from the Rider-Waite tarot deck, and early photographs of ritual dress and practice.

How To Watch Soccer Like a Genius

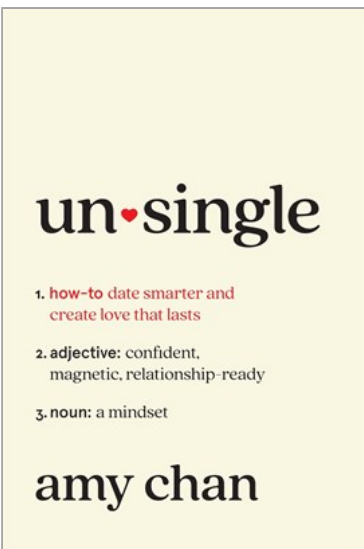

WHAT ARCHITECTS, STUNTWOMEN, PALEOANTHROPOLOGISTS, AND COMPUTER SCIENTISTS REVEAL ABOUT THE WORLD'S GAME

NICK GREENE

From the author of *How to Watch Basketball Like a Genius*, a brilliant deconstruction of the most popular sport in the world, publishing ahead of the 2026 World Cup in North America. On the surface, soccer seems like the simplest of games: one ball, two teams, two goals, and (preferably) some grass. There's a reason it's the first team sport little kids learn to play.

But the closer you look, the more you plumb the game's history, the more infinitely complex the picture becomes. Nick Greene is a man who knows how to look closer than most, especially when he pulls in a wide range of experts to help. In *How to Watch Soccer Like a Genius*, Greene calls on a turf manager, an expert on color theorist, and a landscape historian to understand the field itself, a paleoanthropologist to talk kicking, and an Anglican priest to explain schisms — how American football, soccer, and rugby could all develop from the field games of rowdy 19th century British schoolboys. With insight from a domino toppler, a developmental neuroscientist, an art historian, a civil engineer, and more, you'll never look at soccer the same way again.

Nick Greene is an acclaimed writer celebrated for his inventive approach to sports and culture. He is the author of *How to Watch Basketball Like a Genius*, a book praised for its witty, interdisciplinary exploration of basketball through insights from game designers, economists, ballet choreographers, and even theoretical astrophysicists.

Unsingle

HOW TO DATE SMARTER AND CREATE LOVE THAT LASTS

AMY CHAN

A fun, science-backed dating guide that interrupts the patterns keeping love just out of reach — and empowers readers with the tools to build lasting connection

Dubbed the “scientific Carrie Bradshaw” by *The Observer*, relationship expert Amy Chan has helped countless people transform their love lives through her world-renowned *Breakup Bootcamp* and *Dating Bootcamps*. What she's discovered is surprising: Most singles aren't failing at love because they need years of therapy or a complete personality overhaul. They're stuck in a recurring pattern — and once that pattern is identified and interrupted, everything changes.

In this groundbreaking guide, Chan introduces the Dating Funnel framework, a step-by-step system that pinpoints exactly where people are getting stuck and why. Frank Frazetta

BASIC ART SERIES

DAN NADEL AND ZAK SMITH, EDITED BY DIAN HANSON

Frank Frazetta's fame as the king of fantasy art grows greater every year, as his paintings set new annual auction records. His muscular, fleshy, action-packed oils of heroes, monsters and maidens have defined fantasy worlds for over 50 years and now come at the most affordable price ever.

Born to a Sicilian immigrant family in Brooklyn, 1928, Frazetta was a minor league athlete, petty criminal and serial seducer with movie star looks and phenomenal talent. Using this first-hand knowledge of muscle and macho he redefined fantasy heroes as more massive, more menacing, more testosterone-fueled than anything seen before, and their female counterparts as thick-thighed, heavy-buttocked, and pixie-faced, yet still, with their soft bellies and hints of cellulite, believably real. All in all, Frazetta's art is addictive as potato chips, and now available in a compact, attractive and affordable package.

In the Gardens of Impressionism

CLARE A. P. WILLSDON

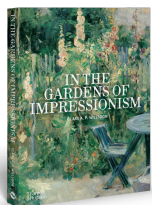

A visual exploration of the Impressionists' love affair with the new thinking about garden design that swept 19th-century France.

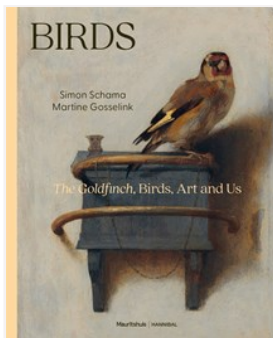

In the Gardens of Impressionism explores the Impressionists' fascination with gardens, parks and flowers in the context of the contemporary craze for horticulture and the changing political and cultural landscape in France. It discusses the artists both as painters and as gardeners, and, using source material such as contemporary gardening manuals, offers exciting new interpretations of their art.

With its insights about familiar works by Manet, Renoir, Degas, Monet and Pissarro, thorough coverage of less familiar Impressionists such as Bazille, Caillebotte and Guillaumin, and spectacular illustrations, including period photographs, engravings from journals and cartoons, as well as paintings and drawings, this book will appeal equally to the scholar, student, art lover or gardening enthusiast.

Hilma af Klint

BASIC ART SERIES

JANIS MINK

Hilma af Klint painted as though she was channeling the universe. Fascinated from childhood by botany and mathematics, she began her career painting landscapes and portraits, but other preoccupations stirred within her: questions of spirit, unseen energies, patterns too vast for the eye alone. Living as a vegetarian, questioning the fixity of gender, af Klint was clearly before her time, yet very much of it too, and pretty much uncelebrated in her day. Only in the 1980s did the world begin to recognise her as a true pioneer of abstract art. This book invites you into her visionary world, via a luminous selection of her works and a detailed essay distilling their complexity.

Freshwater

THE VIEW FROM ABOVE AND THE LIFE BELOW

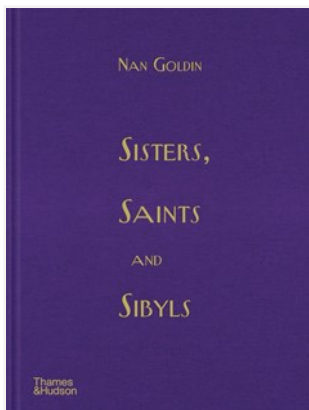

YANN ARTHUS-BERTRAND AND BILL FRANÇOIS

From the bestselling author and photographer of *Earth from Above*, which has sold millions of copies worldwide, comes *Freshwater*, a stunning photography book that unveils the secrets of an invisible world, where every freshwater river, lake, and stream has a story to tell.

Filled with Arthus-Bertrand's classic aerial photography that has sold over 2 million copies, *Freshwater* demonstrates freshwater's creation at the high mountain tops of ice-cold glaciers to its flow through Mexican cenotes, Balkan caves, the American Great Lakes, the Parisian Seine, and more.

However, this book not only shows off Earth's beauty, but also how we are destroying it. Due to overfishing, pollutants, mismanagement, climate change, and other largely man-made issues, we are ridding the world of an important resource. However, through sustainable, global action, we can bring back the biodiversity in our waterways, allowing plant, animal, and human life to flourish.

A fourth action-packed, original story in the Mighty Marvel Team-Up graphic novel series by celebrated cartoonist Mike Maihack, featuring Spider-Man as he journeys with Thor, Valkyrie, and the Warriors Three!

No day is boring when you're Spider-Man and adventure is around every corner. But when Thor hops into the scene, transformed into a mini-Mjölfnir-wielding frog, Spidey's day is about to get even more adventurous! After a heated battle against Enchantress, Thor's friends—Valkyrie and the Warriors Three—and Odin's most powerful artifacts have all been turned into humdrum house objects and scattered across the Nine Realms.

With a knack for seeing the extraordinary in the ordinary, Spider-Man is on the hunt! How hard can finding the artifacts really be? But as Spidey and his mighty mates skate through Frost Giants territory and sweat through Surtur's sweltering home, they realize time is running out before Enchantress finds the destructive doodads for herself, putting Midgard—and the other realms—in danger.

Odds and Ends

MAIJA HURME, TRANSLATED BY MIA SPANGENBERG

A thoughtful, imaginative child decides to make a scrapbook of last moments rather than first moments, then challenges readers to find their own in this charmingly drawn import from Finland. Some people collect pens, shells, or stamps. Others collect friends, trips, or world records. This picture book shares one girl's unusual collection: a collection of lasts. With a feel for the poignant, the bittersweet, and the odd, an observant, emotionally astute child shares the whimsical, eccentric, and touching lasts she has collected, from the last day cold enough for a wool cap, to the last anxious breath before a high dive, to the last person in her class to lose a tooth, to the last piece of chocolate, to the last words of a whole life.

The Sister Who Ate Her Brothers

AND OTHER GRUESOME TALES

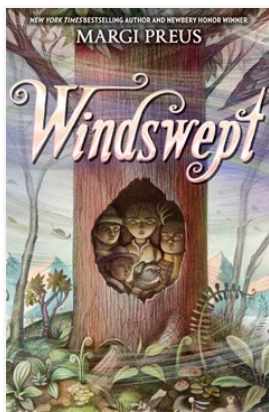

JEN CAMPBELL AND ADAM DE SOUZA

Fourteen of the most gruesome fairy tales from around the world are re-told for contemporary readers and restored to their original, grisly versions.

Jen Campbell's collection of terrifyingly gruesome tales lends a modern edge to fairy tale collections for young readers. Drawing on her extensive knowledge of fairy tale history, Campbell's stories undo the censoring, gender stereotyping and twee endings of more modern children's fairy tales, to return both classic and little-known stories to their grim versions, whilst celebrating a diverse range of characters. These stories have been updated for a modern audience with the addition of queer characters and positive representation of disfigurement and disability.

Featuring 14 short stories from around the globe, *The Sister Who Ate Her Brothers* is illustrated in a contemporary style by Canadian comic artist Adam de Souza. De Souza's brooding illustrations are a highly original blend of 19th-century Gothic engravings and moody film noir graphic novels.
