The Generative Mind

A NEW APPROACH TO CREATIVE THINKING

PATRIK HÜBNER

The author combines systems thinking, generative design and a human-centered perspective to open up a new perspective on working with technology to ideate, design and tell stories. In eight clear principles, he shows how design can be understood as a process that questions boundaries in order to go beyond the visible and shape what is felt: a book for all those who understand creativity as a journey and not just a destination and want to actively shape the future of design.
